石头轮功能介绍

石头轮主要用于玻璃倒角用，前不需要用金刚轮，后面也不需要抛光轮，可以单独倒角，磨出来的效果非常光亮。因此，此产品可以大大节省公司生产成本。石头轮一经问世就收到广大企业的青睐。平行石头轮主要用于玻璃倒安全角，代替倒角BD轮，耐磨度更高。

Stone Wheel

Stone wheel series are mainly used for making and polishing arris as well , no need diamond wheel before it , only one wheel can obtain excellent performance on the arris . It' s well welcomed by glass processing factories because it can save much cost . The periheral one has longer life than BD polishing , which is mainly used for making and polishing safety arris of glass , so many factories always use it in place of BD polishing.
