

## USER'S MANUAL

### LED 230W BEAM MOVE HEAD LIGHT

#### Product Instruction

<b>Voltage:</b> AC90V ~ 275V / 50 ~ 60Hz	<b>LED Source:</b> 230W White LED
<b>Channel:</b> 18/6 CH	<b>Beam:</b> effect of angle change of multistage beam
<b>Color temperature:</b> 7500k	<b>Dimming:</b> 0-100% linear adjustment
<b>LED life:</b> Average 5000 hours	<b>Beam angle:</b> parallel beam angle 0° - 2.3°
<b>Color disk:</b> 7 colors + white light	<b>Atomizing light angle:</b> 8°
<b>Static Gobo:</b> 7 gobos + open	<b>Strobe:</b> 1-25Hz With Pulse Effect
<b>Rotate Gobo:</b> 7 gobos + open	<b>Lumen value parameter:</b> 20m / 186700lux 40m / 48175lux 60m / 20855lux
<b>Prism:</b> 5 array prism and 6 circular prism	<b>Projection range:</b> 540 degrees in X direction, 270 degrees in Y direction, automatic correction and positioning
<b>Appearance:</b> high temperature resistant plastic shell, high strength alloy cold pressed core material	<b>Scanning speed:</b> 3.0 seconds / 540 degrees in X direction, 2.0 seconds / 250 degrees in Y direction
<b>Focus:</b> linear focus	<b>Protection class:</b> IP20
<b>Size of Dimension:</b> 343*239*537mm	<b>Net weight:</b> 12.5KG
<b>Packing Dimension:</b> 48.5*35*39cm	<b>Gross Weight:</b> 14KG

# Display description

## A. software features:

1. LCD 650000 color touch TFT interface, convenient operation, beautiful interface.
2. The two operation modes of physical button and touch are completely independent and can be used in combination.
3. All operations can be completed independently with physical keys.
4. All operations can be completed by touching independently
5. All operations can be completed by mixing physical keys and touch mode.

## B. high intelligence

For example: during reset, check whether hall and optocoupler are wrong and give a prompt.

## C. reset calibration (zero calibration)

X axis, Y axis, color wheel, pattern disk

# Cable connection (DMX)

**IMPORTANT:** The wires must not make contact with each other or with the metal casing of the connectors. The casing itself must be connected to the shield braid and to pin 1 of the connectors.

DMX Output  
3-Pin XLR Socket

DMX Input  
3-Pin XLR Socket

- 1: Ground
- 2: Data (-)
- 3: Data (+)

DMX512 OUT  
3-PIN XLR

DMX512 IN  
3-PIN XLR

## 2.4 DMX-512 connection with DMX terminator

For installations where the DMX cable has to run a long distance or is in an electrically noisy environment, such as in a discotheque, it is recommended to use a DMX terminator. This helps in preventing corruption of the digital control signal by electrical noise. The DMX terminator is simply an XLR plug with a 120 resistor connected between pins 2 and 3, which is then plugged into the output XLR socket of the last fixture in the chain. Please see illustrations below.

Thank you for your patronage. We are confident that our excellent products and service can satisfy you. For your own safety, please read this user manual carefully before installing the device. In order to install, operate, and maintain the lighting safety correctly. We suggest that the installation and operation should be done by the verified technician and follow the instruction strictly.

Every person involved with the installation, operation and maintenance of this device has to:

- be qualified
- follow carefully the instructions of this manual

**CAUTION!** Keep this device away from rain and moisture!

**CAUTION!** Unplug mains lead before opening the housing!

## Rigging (Optional)

**This equipment can be positioned and fixed by clamp in every direction of the stage. Locking system makes it easy to fasten to the bracket.**

**Attention! Two clamps is needed to fix the equipment. Every clamp is locked by fastener of 1/4 kind. Fastener can only be locked clockwise.**

**Attention! Fasten a safety string to the additional hole of side aluminum piece. The secondary accessory can not hang on the delivery handle. Nip the equipment on bracket.**

- Check if rigging clamp (not including the one inside) damaged or not? If stand ten times weight as the equipment. Make sure the architecture can stand ten times weight as all the equipments, clamps, wirings and other additional fixtures.
- Screws for clamping must be fixed firmly. Take one M12 screw (Grade 8.8 or higher) to clamp bracket, and then screw the nuts.
- Level the two hanging points at the bottom of clamp. Insert fastener to the bottom, lock the two levers by 1/4 rotating clockwise; then install another clamp.
- Install on safety string which stands at least ten times weight as equipment. Terminal of the accessory is designed for clamps.
- Make sure pan/tilt lock unlocked or not. Keep the distance more than 1M from equipment to flammable material or lighting source.

# Maintenance and Cleaning

**The following points have to be considered during the inspection:**

- 1. All screws for installing the devices or parts of the device have to be tightly connected and must not be corroded.**
- 2. There must not be any deformations on the housing, color lenses, fixations and installation spots (ceiling, suspension, trussing).**
- 3. Mechanically moved parts must not show any traces of wearing and must not rotate with unbalances.**
- 4. The electric power supply cables must not show any damage, material fatigue or sediments.**

**Further instructions depending on the installation spot and usage have to be adhered by a skilled installer and any safety problems have to be removed.**

## **CAUTION!**

Disconnect from mains before starting maintenance operation.

**In order to make the lights in good condition and extend the life time, we suggest regular cleaning to the lights.**

**1) Clean the inside and outside lens each week to avoid the weakness of the lights due to accumulation of dust. 2) Clean the fan each week.**

**3) A detailed electric check by approved electrical engineer each three month, make sure that the circuit contacts are in good condition, prevent the poor contact of circuit from overheating.**

**We recommend a frequent cleaning of the device. Please use a moist, lint-free cloth, Never use alcohol or solvents. There are no serviceable parts inside the device. Please refer to the instructions under "Installation instructions". Should you need any spare parts, please order genuine parts from your local dealer**
