

1200W Handheld Atomization Disinfection Fog Machine Manual

PACKAGE DETAILS

Product Parameter

- *Rated power: 1200W
- *Rated voltage: 220-240V / 50HZ
- *Water bottle capacity: 260ml
- *Negative ion nano steam gas production: 22ml / Min
- * Spray Distance: .1.5-2.5 meters
- *Power cord length: 2.5 meters
- * Application: car, stage, dj, disco, party, event, concert, performance and so on
- * It can be used to disinfect, clear air, make you feel better.
- * Attention: do not include the liquid, you need to buy liquid in local and put it

machine to use,for the Smoke Oil and Disinfection Water.

*Product weight: 1.25 KG

*Product size: 23 x 10 x 22cm

Instructions

1. After plugging the power cord of this product into the indoor rated socket, press the red start button and wait for the machine to warm up for about 40 seconds. When the green indicator lights, the spray gun can start to spray negative ion nano steam.

2. Function description of negative ion adjustment knob:

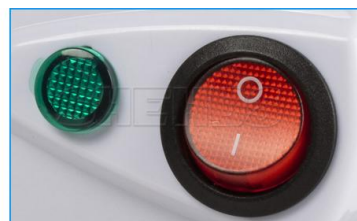

The negative ion adjustment button of the patented design device of this instrument can adjust the size of the water molecule particles of the negative ion nano-steam. The clockwise rotation of the water molecule particles is larger (the amount of mist is also large), and the counterclockwise rotation of the water molecule particles is smaller (the amount of mist is also Small), it is recommended to adjust to the blue fog state when used normally.

3. Be sure to add distilled water to the pure water container.

04

Power Switch

Turn On The Switch Indicator To Light Up,
Start Working,
Turn Off The Switch,
The Indicator Does Not Light Up,
And Stop Working.

06

Design Of Handle Knuckle

The Whole Handle Is Designed With HandJoint For
More Comfortable Use.
Girls With Small Strength Can Also Use It

Straw

Polymer filter pipette to prevent dust from entering the
equipment and causing blockage

Ultra high brightness

Energy saving and durable

Safe and efficient

Human design

GOOD PRODUCT

Humanity design, outstanding performance upgrade, easy to understand operation, easy to install

Product details

01

High End Nano Spray Nozzle

Nano blue light spray nozzle, fog fast, large amount of fog.

02

Multiple Cooling Holes

Simple Cooling Hole Design,
Double-sided Cooling,
Release Nano Spray At The Same Time,
Intelligent Temperature Control.

03

Fog Volume Regulator

You Can Adjust The Fog Size According To Your
Own Needs To Meet Each Scene
