

Li-ion Battery Series L1232

[L1232]

Long Cycle Life: provides up to 20 times longer cycle life and 5 times longer float/service life than lead acid, battery help to minimize replacement costs and reduce total cost of ownership.

Smaller Footprint: better gravimetric/volumetric specific energy up to 3 times compare with lead acid battery.

More Available Energy: deliver twice energy of the lead acid battery, when discharged with heavy load.

Superior Safety: build-in BMS—eliminates the risk of explosion or combustion due to high impact, overcharging or short circuit situation with safe lithium iron phosphate chemistry.

Fully compatible: design to replace VRLA battery, compatible with conventional lead acid powered system.

Notes:

Battery should be kept in a dry and ventilated place, avoid direct contact with corrosive substances, also away from sources of fire and heat. Keep the SOC of the battery above 50% if you need to store it for an extended long period. It should be refresh charged every 3 months regularly and SOC should be maintained at about 50% if battery will be stored for a long term.
