

Note: If current device firmware is lower than V2.05, please upgrade 2 times, first upgrade to V2.05 then upgrade to latest firmware, kindly follow below steps

- 1、 Prepare a U-disk with good quality, then format it to **FAT32 format**
- 2、 Put only one file, **only one** firmware file in U-disk (Don't change firmware name)
- 3、 Insert it to device, access **menu-system-advanced setup-firmware upgrade**
- 4、 Then device will upgrade and restart automatically
(It takes around 1 min to update and restart completely, please don't remove power and u-disk during updating)
- 5、 Access menu-Data Mgt-Init Menu
