

IH-ZBJ-LD Series

Dimmer module

Description

Dimmer module supports 0-10V lighting control for brightness and color temperature adjustment. It connects to the smart home system via a ZigBee gateway.

Feature

- Support ZigBee wireless protocol
- Neutral and live wire power supply
- 0-10V dimming output
- Support brightness and color temperature adjustment

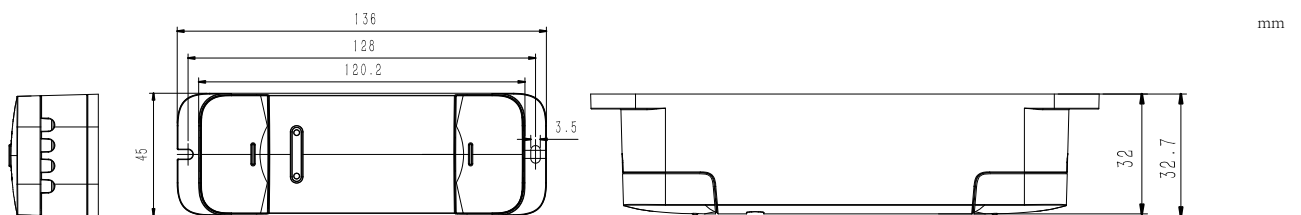

Scene

Ideal for residential and commercial lighting environments requiring dimming control.

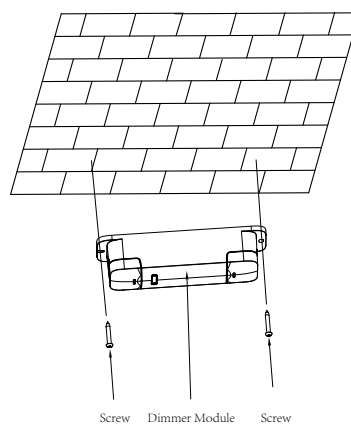

Parameter

Power Supply	100 - 240 VAC (L and N)
Load Circuit	1 / 2
Load Power	200W
Dimming Output	0-10V adjustable, Max 20mA
Communication Protocol	ZigBee 3.0
Product Size	136x45x32mm
