Our Mission

CSP Holding Group has been dedicated to creating the most cost - effective automation equipment and renewable products for more than 30 years in China. Our product range includes solar thermal products, heatpump, solar power systems, water heater automatic production lines, LPG cylinder automatic production lines, steel drum automatic production lines, laser welding and cutting machines, rolling forming lines, CNC punching and bending machines, and hydraulic cylinders for dumpers. Right now, we have global service centers and local offices to offer fast and professional services for our customers locally, such as in Europe, India, Latin America and so on.
